

SAP Plant Maintenance

Contents

Introduction	9
Unit 1: Plant Maintenance Overview	11
Corrective Maintenance	11
Basic Notification	12
Work Order Process	14
Basic Work Order Planning	17
Logistics Planning	17
Execution Planning	17
Basic Scheduling	18
Preventive Maintenance	19
Calendar-Based PM Plans	20
Performance and Counter-Based PMs (Preventive Maintenance Work Orders)	20
Summary	21
Review of Terms	22
Demonstration and Exercise	22
Create a Notification	23
Create a Work Order	27
Release a Notification and Work Order	35
Confirm the Work Order	39
Complete the Work Order	41
Unit 2: Plant Maintenance and Reliability	43
Inspection vs. Monitoring	44
Preventive vs. Proactive	45
SAP-PM and Regulatory Compliance	45
Plant Maintenance and Cost Tracking	46
Feeding Back Corrective Data into PM	47
Failure Data	47
Business Process Integration	49
Maintenance Management Good Practice	50
Unit 3: Plant Maintenance Asset Data	53
Functional Locations	53
Demonstration and Exercise	58

Basic Functional Location Configuration	59
Define Functional Location Categories	59
Define Functional Location Structure Indicator	61
Define Field Selection for Functional Locations	63
Demonstration and Exercise	65
Equipment	66
Creation and Installation of Equipment	66
Demonstration and Exercise	72
Basic Equipment Configuration	73
Maintain Equipment Category	73
Define Equipment Number Ranges	74
Define ABC Indicators	76
Demonstration and Exercise	78
Define Field Selection for the Equipment Master Record	78
Assign User Status Profile to Equipment Category	79
Define History-Related fields	80
Additional Technical Objects	82
Sub-Equipment	82
BOMs (Bills of Material)	84
Demonstration and Exercise	87
PM Assemblies	88
Materials	90
Object Linking	91
Summary	91
Unit 4: Plant Maintenance Organizational Elements	93
Plants	94
Plant Dependencies	94
Plant Maintenance Configuration Settings	95
Maintenance Plants	95
Planning Plants	95
Configuration of Plants	95
Demonstration and Exercise	104
Work Centers	105
Configuration of Work Centers	106
Configuration of Work Centers	107
Define Work Center Types and Link to Task List Application	108
Define Field Selection for Work Centers	110

Set Parameters for Work Centers.....	110
Define Standard Value Keys for Work Centers	112
Define Employees Responsible for Work Centers	114
Define Default Capacity for Work Centers.....	115
Define Default Work Centers	116
Configure Screen Sequence for Work Centers	122
Demonstration and Exercise.....	125
Planner Groups	126
Maintenance Planner Groups	127
Capacity Planner Groups.....	130
Demonstration and Exercise.....	131
Unit Summary.....	131
Unit 5: Plant Maintenance Transactional Objects	133
Notifications	134
Malfunction Reports and Maintenance Requests.....	134
Tasks	135
Catalogs.....	137
Status Management.....	141
Configuration of Notifications.....	142
Define Notification Types.....	143
Set Screen Templates for the Notification Type	144
Define Transaction Start Values	147
Assign Standard Texts for Short Messages to Notification Types	148
Allowed Change of Notification Type.....	149
Assign Notification Types to Order Types	149
Demonstration and Exercise.....	150
Creation and Maintenance of Code Catalogs.....	151
Maintain Catalogs	152
Define Catalog Profile.....	154
Change Catalogs and Catalog Profile for Notification Type	156
Demonstration and Exercise.....	157
Notification Processing	157
Define Priorities.....	158
Define Response Time Monitoring	161
Define Status Profile	162
Create Authorization Keys for User Status Authorizations	165
Maintain Selection Profiles	165

Define Object Information Keys	167
Assign Object Information Keys to Notification Types	169
Define System Conditions	170
Define Operational Effects	171
Demonstration and Exercise	171
Work Orders.....	172
Operations	178
Material Commitment and Procurement	179
Labor Planning	180
Service Planning	180
Standard Texts	181
Demonstration and Exercise	183
Production Resources and Tools	184
Configuration of Work Orders	186
Configure Order Types.....	187
Indicate Order Types for Refurbishment Processing	190
Order Types and Investment Management	190
Configure Number Ranges	191
Assign Order Types to Maintenance Plants.....	192
Assign Inspection Types to Maintenance/Service Order Types	193
Define Default Value for Planning Indicator for Each Order Type	193
Create Default Value Profiles for External Procurement.....	194
Define Access Sequence for Determining Address Data	195
Create Default Value Profiles for General Order Data	196
Default Values for Task List Data and Profile Assignments.....	197
Settlement Rule: Define Time and Creation of Distribution Rule	198
Define Proposed Reference Time for Technical Completion	199
Define Transfer of Project or Investment Program	199
Define Relevant Fields for Assignment of IM Program	199
Define Default Order Types for Maintenance Items.....	200
Define Notification- and Order Integration.....	201
Demonstration and Exercise	202
Work Order Control Keys	202
Maintain Control Keys	203
Maintain Default Values for Control Keys for Order Types	205
Maintenance Activity Types	206
Define Maintenance Activity Types	206

Assign Valid Maintenance Activity Types to Maintenance Order Types	207
Default Values for Maintenance Activity Type for Each Order Type	208
Costing Data for Maintenance- and Service Orders	209
Define Change Docs, Collective Purc. Req. Indicator, Operation No. Interval	210
Set Workflow for Orders	211
Define Documentation for Goods Movements for the Order	212
Set List Editing for Goods Movements for Orders	212
Reorganization of List for Goods Movements for Orders	212
Define Checking Rules	213
Define Scope of Check	214
Define Inspection Control	216
Assign Standard Texts for Short Messages to Order Types	218
Define View Profiles	219
Assign View Profiles to Order Types	220
Demonstration and Exercise	221
Maintenance and Work Orders: General Data	222
Define Default Values for Component Item Categories	222
Define Movement Types for Material Reservations	223
Define Account Assignment Cat. and Document Type for Purchase Requisitions	223
Define Accounting Indicators	224
Define Priorities	224
Create System Conditions or Operating Conditions	227
Activate Default Value for Current Date as Basic Date	228
Define Default Values for Units for Operation	229
Define Status Profile	230
Create Authorization Keys for User Status Authorizations	233
Work Order Partner Determination:	233
Define Partner Determination Procedure and Partner Function	233
Work Order Scheduling:	237
Maintain Scheduling Types	237
External Scheduling	240
Create Revisions	240
Production Resource/Tool Assignments	241
Define PRT Control Keys	241
Formulas	242
Define Shop Papers, Forms, and Output Programs	243

Define Printer	245
Message Control	247
Assign Default Values for Settlement Areas to Order Types	247
Define Object Information Keys	248
Assign Object Information Keys to Order Types	250
Interface for Procurement Using Catalogs (OCI)	251
Maintenance Event Builder	252
Maintain Revision Type	252
Maintain Revision Number Range	253
Completion Confirmations	254
Define Control Parameters for Completion Confirmations	254
Define Causes for Variances	257
Define Execution Time for Confirmation Processes	258
Parallelized Confirmation Processes	258
Schedule Background Jobs Confirmation Processes	259
Set Screen Templates for Completion Confirmation	259
Demonstration and Exercise	261
Summary	262
Unit 6: Preventive Maintenance Objects	263
Task Lists	264
Task List Types	264
Maintenance Strategies and Package Assignments	265
Configurable General Task Lists	266
Configuration of Task Lists	266
Define Task List Usage Keys	267
Maintain Control Keys	268
Define Suitabilities	270
Maintain Task List Status	271
Define Task List Usage	272
Maintenance Task List Profile Data	273
Default Value BOM Usage for Free Material Allocation	274
User Fields	274
Demonstration and Exercise	276
Preventive Maintenance Items	277
Single Maintenance Items	277
Multiple Maintenance Items	278
Object Lists	278

Preventive Maintenance Plans.....	279
Single Cycle Plans.....	280
Strategy Plans.....	281
Multiple Counter Plans.....	281
Maintenance Plan for Service Procurement.....	281
Configuration of Maintenance Plans and Maintenance Items.....	282
Set Maintenance Plan Categories.....	282
Define Sort Field for Maintenance Plan.....	283
Measuring Points and Measurement Documents.....	284
Measurement Point.....	284
Measurement Documents.....	284
Configuration of Measurement Points, Counters, and Measurement Documents.....	285
Make System Settings for Measuring Points and Measurement Documents.....	286
Define Measuring Point Categories.....	286
Demonstration and Exercise.....	288
Unit 7: Cross Application Objects.....	291
Classification.....	292
Overview.....	292
Creating the Classification System.....	292
Using the Classification System.....	293
Configuring the Classification System.....	294
Define Default Settings.....	295
Define Characteristics Groups.....	296
Define Characteristic Statuses.....	297
Define Template Characters.....	298
Define Templates.....	299
Demonstration and Exercise.....	300
Classes.....	301
Maintain Object Keys.....	301
Maintain Object Types and Class Types.....	303
Define Class Groups.....	304
Maintain User Profile.....	306
Demonstration and Exercise.....	307
Save the class.Document Management.....	311
Document Management.....	312
SAP Archive Link.....	313

Document Management for Technical Objects	314
Object Services	315
Demonstration and Exercise	317
Summary.....	318
Unit 8: Integration of Plant Maintenance With Other Modules	319
Finance	320
Cost Centers	320
Cost Elements	320
Labor Activity Types	321
Procurement	323
Material Masters.....	323
Purchase Requisitions.....	325
Purchase Orders	327
Outline Agreements and Contracts	328
Service Entry Sheets.....	330
Demonstration and Exercise	332
Summary.....	333
Unit 9: Reporting	335
Overview of Reporting in SAP-PM.....	336
Reporting on the Maintenance Work	337
Taking Control of the Maintenance Work.....	337
Work Backlog Trend.....	338
Preventive Maintenance Overdue Hours	340
Preventive Maintenance Compliance.....	341
Preventive Maintenance to Total Work Ratio.....	341
Reactive Maintenance Ratio	343
Reporting on the Equipment	345
Taking Control of the Equipment.....	345
Bad Actor Report.....	345
Breakdown Report.....	348
Production Critical Equipment Availability.....	350
Mean Time between Repairs (MTBR).....	350
The Mean Time between Failures (MTBF)	350
Demonstration and Exercise	352
Summary.....	358
